INTERNATIONAL SEARCH REPORT

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

A common matter pertaining to the inventions in Claims 1-4 and 5-6 is a paper diaper to which design prints are applied to a paper diaper product body in the relation of $A > B \geq 1/3A$ where the width of the paper diaper product body is A and the width of the face of the design prints is B.

The result of search reveals that the paper diaper is not novel since it is disclosed in Document JP 513645 A (2000) (The Procter & Gamble Co.), 17 October, 2000 (17.10.00), line 5, page 15-line 5, page 16, Figs. 10-11.

(continued to extra sheet)

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

Continuation of Box No. III of continuation of first sheet (2)

Since the paper diaper makes no contribution over the prior art, the common matter (paper diaper) is not a special technical feature in the meaning of the second sentence of PCT Rule 13.2.

Accordingly, there is no common matter pertaining to all the inventions in claims 1-4 and 5-6.

Since there is no other common matter considered to be a special technical feature in the meaning of the second sentence of PCT Rule 13.2, any technical relation in the meaning of PCT Rule 13 cannot be found among these different inventions.

As a result, it is clear that the inventions in Claims 1-4 and 5-6 do not fulfill the requirement of unity of invention.
